- It was great training for the 6 months in the professional company and getting expenses from them

15th January 2026 — 14th July 2026

PROJECTS:

- **AI Based Text Speak & Voice Weaver (To help disable people)**
 - Text to speak convert the text to voice so who can't speak can easily communicate with others
 - Voice Weaver helps in voice to text so the blind guy can speak the text and the deaf person can read it
 - **Real-Time Emotion Detection (Python)**
 - Detect the face emotion of the person and tells the emotion of that person
 - **Finger counting (Python)**
 - It counts the person finger through web camera and tells how many figures are there and it works on real time
 - **Disease-Prediction-System**
 - It is based on the Dataset of two health models Heart and Diabetes
 - It will help people to that they have any heart problems or Diabetes problem
 - Using python for the Backend and to train the model and using HTML and CSS for the frontend
 - **Fake-News-Detector**
 - It will help the users to get the real news not the fake ones out of 100th news
 - Right now, I have used the dataset of real and fake news and if I connect the Api and train it properly it can run on real time and tell the real news and acquires rate is 78.98 %
-
